

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

R

111966

111966

To the Honourable

WILLIAM TEMPLEMAN, M.P.,

Minister of Mines.

SIR,—I have the honour to submit the General Index, embracing the New Series of Reports of the Survey (1885–1906).

The observations of the Survey embodied in its reports accumulate rapidly unless a general index is prepared from time to time valuable information becomes buried under a mass of succeeding publications to be lost sight of by the public or difficult to be found by long and diligent search.

The material collected by the Survey from 1847 to 1863 was condensed and systematized in the *Geology of Canada* published in 1863, which was virtually a General Report of Progress to date.

In 1897, under Dr. DAWSON's instructions, Mr. D. B. DOWLING prepared a general index covering the Survey's publications from the 1863 report to the end of the Old Series, 1884 report, inclusive. The New Series, which commenced with the 1885 report, contains individual indexes, and consequently, for some years, did not call for a general index, but by 1904 the number issued had become so large that Dr. BELL commissioned Mr. FRANK NICOLAS to compile a full index to these reports. This heavy task was accomplished in his time after office hours. The original intention was to exclude minor references to palaeontology, botany and glaciation but at the request of officers of the Survey especially interested in such sections of geology, the author extended his work to cover these subjects, without extra remuneration. This was only possible through the help of the officers especially interested, which the author fully acknowledges.

The work was undertaken in May, 1904, and completed in May, 1906. In view of the conditions under which the work was accomplished, the accuracy required, and the magnitude of the task—about 180,000 references are included—it is evident that the author has displayed commendable zeal and expedition.

It is believed that this Index will materially aid the public in readily obtaining desired information from the New Series reports.

This, combined with the former index (1863–1884), forms a complete index to the English edition of the Survey publications. Lists of these publications are issued from time to time and may be obtained by anyone, on application to the Survey.

I have the honour to be, Sir,

Your obedient servant,

R. W. BROCK,
Acting Director.

OTTAWA, January, 1908.

11

To the Honourable .

WILLIAM TEMPLEMAN, M.P.,

Minister of Mines.

SIR,—I have the honour to submit the General Index, embracing the New Series of Reports of the Survey (1885–1906).

The observations of the Survey embodied in its reports accumulate rapidly and unless a general index is prepared from time to time valuable information becomes buried under a mass of succeeding publications to be lost sight of by the public or otherwise to be found by long and diligent search.

The material collected by the Survey from 1847 to 1863 was condensed and systematized in the *Geology of Canada* published in 1863, which was virtually a General Report of Progress to date.

In 1897, under Dr. DAWSON's instructions, Mr. D. B. DOWLING prepared a general index covering the Survey's publications from the 1863 report to the end of the Old Series, 1884 report, inclusive. The New Series, which commenced with the 1885 report, contains individual indexes, and consequently, for some years, did not call for a general index, but by 1904 the number issued had become so large that Dr. BELL commissioned Mr. FRANK NICOLAS to compile a full index to these reports. This heavy task was accomplished in his time after office hours. The original intention was to exclude minor references to palaeontology, botany and glaciation but at the request of officers of the Survey especially interested in such sections of geology, the author extended his work to cover these subjects, without extra remuneration. This was only possible through the help of the officers especially interested, which the author fully acknowledges.

The work was undertaken in May, 1904, and completed in May, 1906. In view of the conditions under which the work was accomplished, the accuracy required, and the magnitude of the task—about 180,000 references are included—it is evident that the author has displayed commendable zeal and expedition.

It is believed that this Index will materially aid the public in readily obtaining desired information from the New Series reports.

This, combined with the former index (1863–1884), forms a complete index to the English edition of the Survey publications. Lists of these publications are issued from time to time and may be obtained by anyone, on application to the Survey.

I have the honour to be, Sir,

Your obedient servant,

R. W. BROCK,
Acting Director.

OTTAWA, January, 1908.

A. P. Low, LL.D., &c.,
Deputy Minister and Director,
Geological Survey of Canada.

DEAR SIR,—I have the honour to submit, according to the contract originally made by Dr. R. BELL, and subsequently endorsed by you, a General Index to the "Annual" volumes, sixteen in number, published by the Geological Survey since 1884. These volumes, though nominally "Annual," sometimes include the reports of two years; they contain most of the principal publications issued by the Survey during the last twenty-two years.

It was not until a large portion of this work had been completed that Parliament passed a Bill constituting the new provinces of Alberta and Saskatchewan and cancelling the territories of Assiniboia and Athabaska. The change naturally entailed a great amount of work in bringing the references to conform to the new boundaries; had it not been for these necessary changes this Index would have been published much earlier.

I take this opportunity of acknowledging that without the help of all the officers of the Geological Survey this work could never have attained accuracy. That help has been given, in every case, unstintingly. To the Palæontologists of the Survey, and especially to Dr. J. F. WHITEAVES, who has revised every galley, are due the excellent fossil and zoological references included in the work: and similar acknowledgments are due to Prof. J. MACOUN and Mr. J. M. MACOUN for the careful manner in which they have checked the botanical and ornithological lists.

As regards the other officers of the Department there is not one who has not, from time to time, given me valuable help, but I must tender special thanks to Mr. D. B. DOWLING, whose intimate knowledge of the Grass River district and the coal areas of the Rocky mountains, together with his previous experience gained in indexing the Geological Survey reports from 1863 to 1884, has added much to the usefulness of this work; to Mr. HUGH FLETCHER, whose lively interest in the work from its initiation and whose many years of exploration in Nova Scotia enabled me to follow the reports of that province much more ably than could otherwise have been possible; to Dr. R. W. ELLS, who took an immense amount of trouble in elucidating many of the geographical and geological features of New Brunswick and Quebec; to Mr. W. MCINNIS, to whom the correct locating of the innumerable streams and lakes in the Rainy River and southern Thunder Bay districts is mainly due; and to yourself, who, though overburdened with the cares of Directorship, never grudged the time to adequately discuss references to northern Quebec, the unpronounceable names of Labrador and the position of numerous questionable localities in Franklin.

The geographical names of this Dominion had, in many cases, become so distorted by local use or by careless authors and map-makers, that Parliament appointed, in 1898, a Geographic Board, to give decisions on disputed nomenclature. In order that this General Index should be made as far as possible a standard work in regard to the correct

spelling of the names of Canadian localities, Mr. JAMES WHITE, Dominion Geographer, a member of the Board, carefully revised the first three hundred pages and, but for the necessity of his visit to England, would have continued to check the entire work. In the balance of the Index the spelling of the names is in accord with the decisions of the Board, so far as they were published up to the time of going to press.

A special point has been made throughout the volume, of supplying, whenever possible, the full initials of any person to whom reference has been made. In connexion with this endeavour, over one thousand letters have been written asking for information and all but seven have elicited replies. For information of this description I am especially indebted to Mr. C. C. CHIPMAN, Commissioner of the Hudson's Bay Company at Winnipeg.

As to typographical errors the compiler believes that the Index will compare favourably with any similar work published in Canada and for this he tenders his grateful thanks to his assistant Miss ETHEL WHITE, whose vigilance and untiring efforts have very largely contributed to make this work of reference worthy of the reports of which it endeavours to form a synopsis.

Your obedient servant,

FRANK NICOLAS.

OTTAWA, January, 1908.

ABBREVIATIONS.

Alta	Province of Alberta, (including the former territory of Alberta and the western portions of the former territories of Saskatchewan, Assiniboia and Athabaska).
B. C.	Province of British Columbia.
C. B.	Cape Breton.
C.P.R.	Canadian Pacific Railway.
Frank.	Provisional district of Franklin*.
G.T.R.	Grand Trunk Railway.
H.B.C.	Hudson's Bay Company.
I.C.R.	Intercolonial Railway.
Kee.	Provisional district of Keewatin*.
Lab.	Labrador and the provisional district of Ungava*.
Mack.	Provisional district of Mackenzie*.
Man.	Province of Manitoba.
N. B.	Province of New Brunswick.
N. S.	Province of Nova Scotia.
Ont.	Province of Ontario.
P.E.I.	Province of Prince Edward Island.
Q.C.I.	Queen Charlotte islands.
Que.	Province of Quebec.
R. M.	Rocky mountains.
Sask.	Province of Saskatchewan, including the eastern portions of former territories of Saskatchewan, Assiniboia and Athabaska.
V. I.	Vancouver island.
Ykn.	Territory of Yukon.

The above divisions have been chosen in consultation with the Dominion Geographer as being, on account of general usage, the most suitable. According, however, to Act of Parliament, Keewatin, Ungava, Mackenzie and Franklin have no legal existence, the whole being included under the general term North-west Territories, while Labrador includes only that portion of the Atlantic coast under the jurisdiction of Newfoundland.

* As defined by Order-in-Council.

NOTES.

With the exception of the new provinces of Alberta and Saskatchewan, and the districts of Ungava and Labrador (which are included under the abbreviation "Lab."), the provinces, provisional districts and territory mentioned in this Index are those coloured in the map of the Dominion of Canada published by the Department of the Interior in 1903.

Throughout this work all localities in Ottawa county, Quebec, have been referred either to "Labelle county" or to "Wright county." These divisions are not "counties" in the accepted meaning of the term, but are electoral divisions for the Federal Parliament and are Judicial divisions for Provincial Government purposes.

For purposes of more exact reference certain areal names are used in the Index that are not the names of political divisions but refer to areas covered by published geological map-sheets.

These are :—

Grass River dist.—comprising the area to the northwest of Lake Winnipeg, lying between the lower Saskatchewan river and the Churchill river and between Cumberland lake and the Nelson river.

Manitou dist.—comprising that part of Rainy River district to the east of Lake of the Woods and north of Rainy lake extending from Hawk Lake station to Taché station on the Canadian Pacific railway and from the foot of Manitou lake to a few miles north of the railway.

Ignace dist.—comprising a rectangular part of Rainy Lake district cut diagonally by the Canadian Pacific railway between Taché and English River stations and extending about twenty miles to the north and south of the railway.

Seine River dist.—comprising the part of Rainy River district lying to the north of Hunter island and to the south of the last named area and extending from the boundary of Thunder Bay district westerly nearly to Rainy lake.

Shebandowan dist.—comprising the part of Thunder Bay district lying between its western boundary and Thunder bay and extending north and south between Carlstadt station and Port Arthur.

RAINY RIVER DIST., ONT. 168 F	III		LeRoy Pt. o	XIV	
Island bay, TIMAGAMI LAKE, ONT. 136 I	X		Island of Orleans, St. LAWRENCE		
Island Brook, COMPTON CO., QUE. 47 J	II		RIVER, QUE.		
Island falls, EASTMAIN RIVER, QUE.			Anthracite in 19 T	IV	
78, 261, 288, 296 L	VIII		Champlain fault on 54 A	I	
Island falls, GUNFLINT RIVER, THUN-			31, 44 K	III	
DER BAY DIST., ONT. 106 A	XIII		30, 31 L	V	
Island falls, SEINE RIVER, ONT.			Conglomerate zone of 83 K	III	
Gold prospecting near 64 H	X		Fossils from 36 A	II	
Indian reserve at 7 H	X		46, 59, 82 K	III	
Water-power of 9 H	X		Geology of, by Ellis 70-73 K	III	
Island Hotel, ISLAND OF ORLEANS,			Glauconite on 37 K	III	
QUE.			35 T	IV	
Rocks in vicinity of 72 K	III		Graptolitic zone of 45 K	III	
Island lake, BEAVER HILLS, ALTA.			Hudson River formation on 24 K	III	
Cree and Stoney names of 174 E	II		Limestone from, for hydraulic		
Source of Deep creek 44 E	II		cement 123 K	IV	
Island lake, (BIG) SALMON RIVER,			Quebec group on 26, 44, 59 K	III	
YUKON.			Sands of, fluvialite 65-67 B	XIII	
Depth of 47 A	XI		142 AA	XV	
Description of 152 B	III		Section of, ref. to Logan's 37 A	II	
Island lake, ERMATINGER TP., AL-			Surveys on, ref. to 38, 71 A	I	
GOMA DIST., ONT. 92 F	V		Island pt., LAKE TIMISKAMING, ONT. 192 I	X	
Island lake, HAMILTON RIVER, LAB. 143 L	VIII		Island pond, BARNSTON TP., STAN-		
Island lake, JOHNNY BROOK, COL-			STEAD CO., QUE. 36 J	II	
CHESTER CO., N.S. 93 P	V		Island pond, N. OF EDWARDS CREEK,		
Island lake, LAKE OF THE WOODS,			NORTH THOMPSON RIVER, B.C.		
ONT. 8 CC	I		Rocks in vicinity of 109 B	VII	
Island lake, PONTIAC CO., QUE.			Island portage, ABITIBI RIVER, ONT.		
Mineral belt on 213 A	XVI		234, 239 A	XV	
Rocks on 220, 221 A	XVI		Island portage, BELANGER RIVER,		
Island lake, PORTNEUF CO., QUE. 49, 50 J	XI		L. WINNIPEG, KEE. 34 C	XI	
Island lake, S. OF GODS LAKE, KEE. 114 E	IV		Island portage, BELL RIVER, ABITIBI		
Island lake, STONEY PLAIN DIV.,			DIST., QUE. 10 K	XIII	
ALTA. See Isle lake			Island portage, MISSINAIBI RIVER,		
Island lake, THISTLE TP., NIPISSING			ONT. 84 D	XIII	
DIST., ONT. 248 I	X		Island portage, WANAPITEI RIVER,		
Island lake, THLEWIAZA RIVER, KEE.			ONT.		
Notes on, by Tyrrell 114 F	IX		Magnesian limestone at 14, 54 F	V	
Island mine, LEIPSIGATE GOLD DIST.,			'Islander' s.s. 38 A	XI	
N.S. 324 A	XVI		Isle à la Crosse lake, CHURCHILL		
Island mt., CARIBOO DIST., B.C.			RIVER, SASK.		
Gold and gold mining on 29, 34-37 C	III		Altitude of 156 E	IV	
Map of With Vol.	III		Cretaceous rocks on 19 D	VIII	
Ore from, cyanided in Glasgow 168 S	VI		Glacial striae near 116 E	IV	
Quartz from, assay of 47 T	III		Indians at (Chipewyan) 14 D	VIII	
Island Mountain Gold Mining Co. 69 S	V		Isle Elizard, St. LAWRENCE RIVER,		
Island of Montreal, St. LAWRENCE			QUE.		
Building-stone of 89 J	VII		Cambro-Silurian on 44 J	VII	
Cambro-Silurian of 44-50 J	VII		Isle Jésus. See Jesus island.		
Conditions prevailing beneath 14 O	XIV		Isle of Man, TIMISKAMING LAKE.		
Fossils from 116-120 K	III		See Mann island.		
119-122 J	VII		Isle lake, STONEY PLAIN DIV., ALTA. 6 D	XI	
			Isle Perrot, LAKE ST. LOUIS, QUE.		
			Potsdam sandstone on, used for		
			glass making 155 K	IV	
			44 J	VII	
			Isle Ronde, OFF MONTREAL, QUE.		
			See Round island.

boring for coal, report by Ellis.

369-379 A	XV
surface, report by Chalmers.	Pt. M VII
summary.	53, 54 AA VI
Graphite imports of, 1885-86.	34 s II
1887.	29 s III
1888.	36, 37 s IV
1889.	40, 41 ss IV
Gypsum statistics of, 1885-86.	37 s II
1888.	40 s IV
1889.	44 ss IV
Iron statistics of, 1885-86.	41 s II
1887.	33-39 s III
1888.	45 s IV
1889.	50, 51 ss IV
1890.	88 s V
1891.	87 ss V
1892.	81 s VI
1893.	67 s VII
1894.	67 s VII
1895.	40 s VIII
1896.	65 s IX
1897.	85 s X
1898.	86 s XI
1899.	59 s XII
Lead statistics of, 1873-1886.	52, 53 s II
Level of, changes in.	25, 32 M VII
Lime sent to, from Nova Scotia.	68 E I
Map of, (Index).	With Vol. XIV
outline, showing anticlines.	With Vol. XV
Marine deposits in west portion, sections of.	112, 113 M VII
Mineral export from, 1873-1886.	8 s II
pigments imports, 1886.	51 s II
1887.	47, 48 s III
1888.	56, 57 s IV
water imports, 1888.	64 s IV
1889.	67 ss IV
Mussel mud of.	134 M VII
Peat-bogs of.	57 AA VI
118, 119, 145 M	VII
Petroleum imports of, 1873-1886.	58, 59 s II
1887.	58 s III
1888.	71 s IV
1889.	92, 93 ss IV
Salt statistics of, 1873-1886.	70-72 s II
1887.	87, 88 s III
1888.	79 s IV
1889.	101-103 s IV
Sandstone of.	9 R I
56 GG	I
Striae on.	83, 96, 105, 106 M VII
Structural material statistics of:—	
1874-1875.	79 s II
1885-1886.	76-78 s II
1887.	98-102 s III
1888.	81-93 s IV
1889.	109-122 ss IV
1890.	182-200 s V
1891.	183-198 ss V
1892.	197-212 s VI
1893.	182, 183, 185 s VII
1894.	182, 183, 185 s VII
1895.	97, 99 s VIII
1896.	164, 165 s IX
1897.	210, 212 s X
Sulphuric acid imports of:—	
1885-1886.	61 s II
1887.	82 s III
1888.	75 s IV
1889.	98 ss IV
Summary report on, by L. Watson.
